

Statistical Discovery.™ From SAS.

## JMP® 8 - QUICK GUIDE

*Instructions presume a data table is open and the user will specify the appropriate variables of interest.*

For complete information, please refer to the JMP Introductory Guide available under “Help > Books”.

| <b>Graphing</b>        |  |
|------------------------|--|
| Frequency Distribution | Analyze > Distribution   |
| Bar Chart              | <ol style="list-style-type: none"> <li>1. Graph &gt; Graph Builder &gt; Drag Continuous Variable to Y and Categorical to X &gt; RMC &gt; Points &gt; Change to &gt; Bar</li> <li>2. Graph &gt; Chart</li> </ol>  |
| Pie Chart              | Graph > Chart > Options > Pie Chart  |
| Histogram              | Analyze > Distribution   |
| Stem-and-leaf display  | Analyze > Distribution; select  Stem and Leaf  |
| Scatter Plot 2D        | <ol style="list-style-type: none"> <li>1. Graph &gt; Graph Builder &gt; Drag Continuous Variable to Y and another one to X</li> <li>2. Analyze &gt; Fit Y by X (Bivariate)</li> <li>3. Graph &gt; Overlay Plot</li> </ol>  |
| Scatter Plot 3D        | Graph > Scatterplot 3D   |
| Scatter Plot Matrix    | <ol style="list-style-type: none"> <li>1. Graph &gt; Scatterplot Matrix</li> <li>2. Analyze &gt; Multivariate Methods &gt; Multivariate</li> </ol>   |
| Trellis Plot           | Graph > Graph Builder > Drag Column to Y and one to X; Drag Nominal or Ordinal Column to Wrap  |
| Line Chart             | <ol style="list-style-type: none"> <li>1. Graph &gt; Graph Builder &gt; Drag Continuous Variable to Y and another one to X &gt; RMC in graph &gt; Smoother &gt; Change to &gt; Line</li> <li>2. Graph &gt; Overlay Plot; select  y options &gt; Connect Points</li> </ol> |
| Box Plot - One Level   | <ol style="list-style-type: none"> <li>1. Graph &gt; Graph Builder &gt; Continuous column to Y &gt; RMC &gt; Points &gt; Change to &gt; Box Plot</li> </ol>  |

|   |  |
|---|--|
|   | 2. Analyze > Distribution  |
| Box Plot - Two or More Levels   | <ol style="list-style-type: none"> <li>1. Graph &gt; Graph Builder &gt; Continuous column to Y and categorical to X &gt; RMC &gt; Points &gt; Change to &gt; Box Plot</li> <li>2. Analyze &gt; Fit Y by X; select  Display Options &gt; Box Plot</li> </ol>   |
| <b>Basic Statistics</b>   |  |
| Descriptive statistics  | <ol style="list-style-type: none"> <li>1. Analyze &gt; Distribution; select </li> </ol> <p>Display Options &gt; More Moments</p> <ol style="list-style-type: none"> <li>1. Tables &gt; Summary</li> <li>2. Tables &gt; Tabulate</li> </ol>  |
| z- or t- test <ol style="list-style-type: none"> <li>1. 1-Sample</li> <li>2. 2-Sample</li> <li>3. Paired t</li> </ol>   | <ol style="list-style-type: none"> <li>1. Analyze &gt; Distribution; select  Test Mean</li> <li>2. Analyze &gt; Fit Y by X; select  t Test or Means/ANOVA/Pooled t</li> <li>3. Analyze &gt; Matched Pairs</li> </ol>   |
| Testing Proportions ( <i>make 0/1 indicator Nominal or Ordinal</i> ) <ol style="list-style-type: none"> <li>1. 1 Proportion</li> <li>2. 2 Proportion</li> </ol> | <ol style="list-style-type: none"> <li>1. Analyze &gt; Distribution; select  Test Probabilities</li> <li>2. Analyze &gt; Fit Y by X</li> </ol>   |
| Contingency table – Chi-Square test   | Analyze > Fit Y by X   |
| Covariance  | Analyze > Multivariate Methods > Multivariate; select  Covariance matrix  |
| Correlation   | Analyze > Multivariate Methods > Multivariate  |
| Test for Normality Test/Goodness-of-fit Test  | Analyze > Distribution; select  Continuous Fit > Normal; select  by Fitted Distribution > Goodness of Fit  |
| <b>Probability/Random Variables</b>   |  |
| Probability Variables   | On data table select  Columns > New Column; RMC on new column > Formula; select Probability from Functions Window; select desired probability function. Note: For more information on the expected parameters see help under Probability Functions  |
| Random Variables  | <ol style="list-style-type: none"> <li>1. On data table select  Columns &gt; New Column; RMC on new column &gt; Column Info. Click on Drop down box next to Initial Data Values &gt; Random</li> <li>2. On data table select  Columns &gt; New Column; RMC on</li> </ol> |

|  |   |
|--|---|
|  | new column > Formula; select Random from Functions Window; select desired Random function. Note: For more information on the expected parameters see help under Random Function |
| Distribution Fitting   | Analyze > Distribution; select  Continuous Fit, then select either Normal, LogNormal or Weibull   |
| <b>Analysis of Variance</b>  |   |
| One-Way  | Analyze > Fit Y by X; select  Means/Anova   |
| Two or more Factors  | Analyze > Fit Model   |
| Randomized Blocks  | Analyze > Fit Y by X; include column in Block role  |
| Multiple Comparison Methods  | Analyze > Fit Y by X; select  Means/Anova; select  Compare Means  |
| Test for Equal/Unequal Variances   | Analyze > Fit Y by X; select  Means/Anova; select  Unequal Variances  |
| <b>Regression</b>  |   |
| Scatter Plot   | <ol style="list-style-type: none"> <li>1. Analyze &gt; Fit Y by X (Bivariate)</li> <li>2. Graph &gt; Overlay</li> </ol>   |
| Simple Least Squares <ol style="list-style-type: none"> <li>1. One Independent Variable</li> <li>2. One or More Independent Variables</li> </ol> | <ol style="list-style-type: none"> <li>1. Analyze &gt; Fit Y by X; select  Fit Line</li> <li>2. Analyze &gt; Fit Model</li> </ol>   |
| Logistic Regression <ol style="list-style-type: none"> <li>1. One Independent Variable</li> <li>2. One or More Independent Variables</li> </ol>  | <ol style="list-style-type: none"> <li>1. Analyze &gt; Fit Y by X; select  Fit Line</li> <li>2. Analyze &gt; Fit Model</li> </ol>   |
| Multiple Regression  | Analyze > Fit Model   |
| Stepwise Regression  | Analyze > Fit Model > Personality – Select Stepwise   |
| Residual Analysis  | Analyze > Fit Model; Run Model; select  Row Diagnostics   |
| Interaction Plots  | Analyze > Fit Model; Run Model; select  Factor Profiling > Interaction Plots  |
| Durbin-Watson Test   | Analyze > Fit Model; Run; select  Row Diagnostics > Durban Watson Test  |
| <b>Time Series</b>   |   |
| Time Series Plot   | Analyze > Modeling > Time Series  |
| Moving Averages  | Analyze > Modeling > Time Series; select  ARIMA   |

|   |  |
|---|--|
| Exponential Smoothing   | Analyze > Modeling > Time Series; select  Smoothing Models  |
| Holt-Winters Method   | Analyze > Modeling > Time Series; select  Smoothing Model > Winters Method  |
| <b>Data Mining</b>  |  |
| Logistic & Multiple Regression  | Analyze > Fit Model  |
| Decision Trees  | Analyze > Modeling > Partition   |
| Neural Networks   | Analyze > Modeling > Neural Net  |
| Clustering  | Analyze > Multivariate Methods > Cluster   |
| <b>Nonparametric techniques</b>   |  |
| Wilcoxon Rank Sum Test  | Analyze > Fit Y by X; select  Nonparametric > Wilcoxon Test   |
| Fishers Sign Test (for 2x2 tables only)   | Analyze > Fit Y by X   |
| Wilcoxon Signed Rank Sum Test   | Analyze > Distribution; select  Test Mean > Check Wilcoxon Signed Rank Box  |
| Kruskal-Wallis Test   | Analyze > Fit Y by X; select  Nonparametric > Wilcoxon Test   |
| Spearman's P  | Analyze > Multivariate Methods > Multivariate; select  Nonparametric Correlations > Spearman's P  |
| <b>Quality Control</b>  |  |
| Control Charts<br><ol style="list-style-type: none"> <li>1. X-bar</li> <li>2. Individual Measurements (IR)</li> <li>3. p Chart</li> <li>4. u Chart</li> <li>5. CUSUM</li> </ol> | <ol style="list-style-type: none"> <li>1. Graph &gt; Control Chart &gt; XBar</li> <li>2. Graph &gt; Control Chart &gt; IR</li> <li>3. Graph &gt; Control Chart &gt; P</li> <li>4. Graph &gt; Control Chart &gt; U</li> <li>5. Graph &gt; Control Chart &gt; CUSUM</li> </ol> |
| Pareto  | Graph > Pareto Plot  |
| Cause & Effect Diagram  | Graph > Diagram  |
| Variability Chart   | Graph > Variability/Gauge Chart  |
| <ol style="list-style-type: none"> <li>1. Capability</li> <li>2. Capability with additional graphs on same output (IR, MR, Distribution, Normal Quantile Plot)</li> </ol>       | <ol style="list-style-type: none"> <li>1. Graph &gt; Capability</li> <li>2. Graph &gt; Control Chart &gt; IR; check Capability Box. &gt; OK, Fill in Specification Limits</li> </ol>   |
| <b>Design of Experiments (DOE)</b>  |  |
| Factorial Design  | <ol style="list-style-type: none"> <li>1. DOE &gt; Full Factorial Design</li> <li>2. DOE &gt; Screening Design</li> </ol>  |

|                                    |                               |
|------------------------------------|-------------------------------|
| Screening Design                   | DOE > Screening Design        |
| Response Surface Design            | DOE > Response Surface Design |
| Sample Size and Power Calculations | DOE > Sample Size and Power   |
